

# What Children Need to Flourish

1/2 Day Professional Development workshop with Developmental Psychologist, **Dr. Gordon Neufeld**

## Learning Outcomes

How immaturity of adaptation, integration and emergence can exhibit as a disorder

The scientifically validated vital importance of the adult-child relationship in the unfolding of human potential

True play vs. what is often construed as 'play' and the vital importance of true play in healthy child development

Why emotional development is potentially the most important development of all; what slows this development, what enhances it

In this seminar, Dr. Gordon Neufeld will share an overview of his model of human development. Psychology and education have long focused on the cognitive and behavioural approaches. His integrated attachment-based developmental approach based on latest neuro-scientific findings has significant and exciting implications for counsellors, educators and parents.
